

EXAM 3 DIRECTIONS

1. If the problem says “See EXCEL”, then you must answer the question(s) using the Excel output. Some Excel Appendices have several Excel output (which may span several pages). You are responsible for looking at all Excel output contained within an Appendix.

2. Carry all decimal places to the very end. If options a-d show four decimal places, round your answer to four places. If options a-d show three decimal places, round your answer to three places. ETC.

3. Go to the closest probability in the Z table to obtain a Z. In the rare instance where the probability is exactly halfway between two probabilities in the Z table, take the average of the two Z's associated with those probabilities.

4. If one of the options (a-d) is correct, you must choose that option.

5. WARNING: Do not discuss the exam format or content with anyone! Giving information or receiving information about the exam format or content is an act of academic dishonesty and will result in an F for the class and possible expulsion from the university.

By taking this exam, you acknowledge that you have read all of the above directions and understand that you will be held responsible for following them.
